

# MEDICAL HUMANITIES

Medical Humanities brings a holistic perspective to the study of health, moving beyond a purely biological framework to consider the patient as a whole person. Drawing upon the analytical tools and insights of the humanities and social sciences, the minor provides an interdisciplinary understanding of the social and cultural dimensions of health and illness.

While traditional pre-health curricula excel at preparing students in the biomedical sciences, this minor addresses a complementary and vital need: to understand the human experience at the center of all healthcare. Courses explore the complex interplay of cultural, ethical, historical, political, and social forces that shape medical knowledge, clinical practice, and the lived experience of illness. Topics of investigation include the doctor-patient relationship, the authority of the physician, changing conceptions of disease, healthcare policy, communication aspects of healthcare and the patient experience, and the profound impact of factors like race, class, and gender on health outcomes.

This minor is of particular value to students planning to attend medical, nursing, pharmacy, or public health schools. Students pursuing careers in social work, counseling, law, journalism, public policy, and healthcare administration will also find that the minor equips them with the critical thinking, ethical reasoning, and cultural competency essential for leadership and effective practice in their respective professions. Regardless of major or career path, the Medical Humanities minor prepares students for engaged and compassionate citizenship.

## Minor Requirements

Code	Title	Credits
Select one of the following Foundation courses:		3
ANTH 225	Medical Anthropology: Cultural Perspectives on Health and Illness	
or MDFL 255	Medical Humanities - The Intersection of Language, Culture, and Health	
or PHIL 226	Medical Ethics	
or SOCG 334	Medical Sociology	
Select 15 credits of the following, in addition to your selected Foundation course, such that at least three disciplines are included and at least 9 of the 18 total credits are 300-level or higher. <sup>1</sup>		15
ANTH 211	Race in Global Perspective
